

Membrane Pressure Relief Valves in Stainless Steel

VHS

EC 1935/2004-certified

Membrane Pressure Relief Valves in Stainless Steel VHS

THE ULTIMATE SAFETY NET AGAINST ABNORMAL CONDITIONS INSIDE BINS OR SILOS

VHS Pressure Relief Valves consist of a cylindrically shaped metallic body with a connecting spigot clamped to the silo, an exhaust outlet spout for duct connection, an elastic membrane able to re-establish pressure balance instantaneously, a counterweight kit to keep the valve closed under normal conditions, and a weather protection cover.

VHS Pressure Relief Valves are the last safety net when abnormal pressure conditions endanger the silo structure. This is why sudden excess or suction pressure inside the silo have to be dealt with instantly. Even though a VHS Pressure Relief Valve should ideally never have to come into action, it must work efficiently and reliably when needed.

Overall Dimensions

VHS273	Excess Pressure	Negative Pressure	kg
Standard type	500 mm H ₂ O *	-50 mm H ₂ O	22
Option	300 ~ 800 mm H ₂ O		

* Calibration by Manufacturer

A	B	C	D
Ø 400 mm	680 mm	Ø 273 mm	Ø 140 mm

Dimensions in mm

Benefits

Compact overall dimensions

Time-saving maintenance

Dust recovery from ducted emissions

High safety level thanks to emission control and ducted exhaust flow

Technical support and worldwide availability of spare parts thanks to the WAMGROUP® subsidiary network

Features

- 304 stainless-steel casing
- Casing diameter: 273 mm (10 in)
- Flow rate: up to 5,000 Nm³/h (2,950 cfm)
- Exhaust outlet for connection with centralised suction system
- Counterweight system never in contact with dust
- Low number of components
- Compliance with European Regulation (EC) No. 1935/2004

Accessories

- Bird net

- Setting kit

Application

Industries

Animal Feed Milling

Bakeries

Ceramic Industry

Chemicals

Detergents Processing

Environmental Technology

Glass Processing

Paint and Varnish Processing
